ETF FLOWS

Latest ETF day: +\$69.1M

5-day flow: +\$710.5M

Illustrative sample values. Availability and methodology may vary by report.

DERIVATIVES

Open Interest: 102,149 BTC

Funding Rate: +0.0003% (balanced)

Example derivatives context, not a trading signal.

VOLUME PROFILE / MODEL ZONES

Volume support area: \$64,780-\$65,830

Volume resistance area: \$65,330-\$66,280

Model estimates, not confirmed exchange order-book data.

REPORT READING

Facts from available public data are separated from model interpretation. Missing, delayed or stale inputs are identified where possible.

Data and limitations

Not every source is available or used in every report. Public data may be delayed, incomplete, stale, unavailable, revised or inaccurate. Model outputs are estimates based on available data and model calculations.

Important disclosure

Bitcoin Pulse Monitor is independent and is not affiliated with Binance, Telegram, ETF providers, exchanges, brokers or trading platforms, unless expressly stated otherwise. Trading and investment decisions remain the user's own responsibility and risk.

This is a format sample. Live Pro reports are generated on a schedule and may differ in data availability, length and market context.
